Storage / Placement Requirements

- Residential jobsites: safety crates should be stored inside the unit.
- Exterior jobsites: safety crates should be stored at the base of the ladder or in the garage.
- Crates should remain accessible and protected from damage or loss.

3

Inspection Verification

- Safety crates will be checked during routine jobsite inspections.
- Qualico CSOs will use the crate to complete their inspection, allowing any worker's working at heights remain working at heights (unless otherwise indicated by the CSO).

KEY MESSAGE

A complete safety crate helps ensure crews have immediate access to essential emergency equipment, safety supplies, and proof of compliance.

Stock it. Place it. Inspect it. Be Ready.
