

SiteDocs **Contractor Lite**

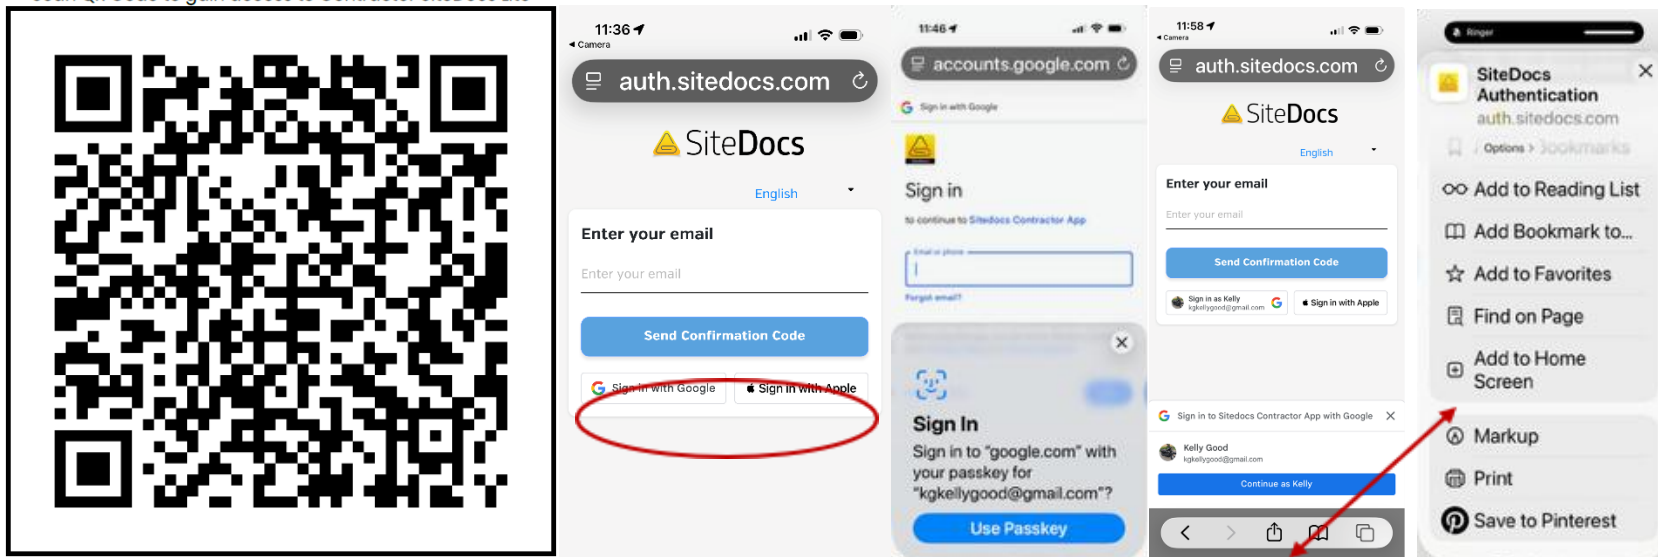

Please follow the steps below to sign in to Contractor Lite (SiteDocs). The SiteDocs mobile app will not work for this process, so you must use the QR code and sign in through your device's web browser instead. These steps should allow you to successfully access Contractor Lite.

Scan the QR code. You will be prompted to enter your email address; however, instead of entering your email, select Sign in with Google or Sign in with Apple ID (if you have a Google or Apple account). Once your account is set up, you will have access to Contractor Lite.

After confirming you can access Contractor Lite, log out of the application.

Next, scan the QR code again. This time, select Add to Home Screen on your device. This will create a shortcut on your home screen, allowing you to access the forms directly without having to scan the QR code each time. Screen shots below to help you along the way.

Scan QR Code to gain access to Contractor SiteDocs Lite

Click the save and then scroll down add to home screen
